classic collection wood species

### MAPLE

Maple is a closed-grained hardwood that is off-white in color and may have light brown and pink hues. It may contain small mineral veining, light tan or reddish streaks that will darken stain.

### CLEAR & KNOTTY ALDER

Clear Alder is a light hardwood with no knots that has a grain pattern similar to Cherry. Knotty Alder will have a variety of knots ranging from tight to open.

### CHERRY

Cherry is a warm, multicolored hardwood. Small pin knots, streaks and gum pockets are common. Cherry wood will darken with age, which gives the species a warm patina.

### WALNUT

Walnut is a very warm species with colors that vary from light to dark chocolate brown with an occasional purplish cast and darker streaks. The wood develops a rich patina that grows more lustrous with age.

### QUARTER SAWN & RIFT WHITE OAK

White Oak is generally light in color and the heartwood varies between light and dark brown. The grain is mainly straight with medium to coarse texture. Quarter Sawn shows the most figure with growth rings at a 60 to 90 degree angle. Rift shows less figure with growth rings at a 30 to 60 degree angle.

*Not all species are available in all door styles. Check with your Executive Cabinetry dealer for availability.*
